

The California Copper Rockfish Stock Assessment Team (STAT*) Invites You to informal virtual discussions on copper rockfish in California's commercial and recreational fisheries. We have questions about copper rockfish and the fisheries and would like to hear from you as we begin diving into the 2023 stock assessment.

We've scheduled the following virtual sessions that will focus on the commercial fishery (Jan. 10), the recreational fishery south of Point Conception (Jan. 23), and the recreational fishery north of Point Conception (Jan. 30). While each meeting has a focus fishery, please attend whenever you're available.

Copper Rockfish & the Commercial Fisheries

Tuesday, January 10 · 3:00 – 4:30 pm
